EDUCATION

Ryerson University | Computer Science   Sept 2016 - June 2021
Bachelor of Computer Science

Courses
Discrete Structure, Computer Security, Software Engineering, Operating Systems, Web Systems Development, Database Systems, Autonomous Mobile Robotics.

Programming Languages
Python, Java, C, Perl, SQL, Javascript, HTML, CSS, C++, PHP, Assembly Language, SQL(Relational DBMS).

PROJECTS

Autonomous Robot   Sept 2019 - Dec 2019
Autonomous Robotics Project, Ryerson University

- Engineered a robot using an Arduino. It has the ability to avoid objects, edges, it can follow lines and sense heat. Coded in C. Using many ultrasonic and Ir sensors, the robot can survive on a surface all on its own using code.

Web Page Development   Sept 2019 - Dec 2019
Web Development Project, Ryerson University

- Developed using HTML and CSS, created a website for users. The webpage is an informative page for Laravel and React. Multiple pages that connect. Worked in a team to complete this task. Completed every page except for the Demo and Tutorial.

Online Movie Store   Jan 2019 - April 2019
Database Systems Project, Ryerson University

- Designed and Developed a database that is used to either purchase or rent a movie.
- Using SQL three Users were created, customer, employee, and manager.
- All had logins consisting of email and password. Customers logged in and purchased movies of their choice.
- All covered with a GUI coded in Java. This is just a project no movies can be actually purchased, just hypothetical.

Knock Lock   Jan 2019 – April 2019
Computer Organization Project, Ryerson University

- Coded and Engineered a mini robot using C, it unlocks/locks a door if the right knock pattern is entered.
- Uses a capacitor to input the knocks entered into the Arduinos software, If entered correctly a Servo motor spins and unlocks the door.

PROFESSIONAL EXPERIENCE

RE/MAX Premier   Jan 2019 – Present
